

IBM Endpoint Manager Provides Global Control and Visibility.

IBM Endpoint Manager delivers an end-to-end approach and provides near-instant visibility into enterprise assets. A single unified console enables visibility throughout the environment that correlates vulnerability intelligence to the detailed configuration of each endpoint. This gives organizations an immediate, up-to-date and accurate view throughout their operations essential to assuring that continuous compliance demands are met. Endpoint Manager not only delivers typical endpoint operations relevant to security such as software distribution or configuration management, but also the direct management of endpoint security functionality.

TEKPROS is an IBM Business Partner that is specialized in licensing and implementing solutions to a broad range of clients. We are authorized as a Solutions Provider and Implementation Partner for IBM Hardware and Software Products, and we are SVP/SVI certified for Tivoli Automation and Security. TEKPROS has a strategic focus on IBM Endpoint Manager and has made a significant investment in this practice.

Why Partner With TEKPROS for Endpoint Manager Solutions?

TEKPROS has a comprehensive, state of art Endpoint Manager Lab that offers clients Proof of Concept, custom development and testing. Our Endpoint Manager team is staffed by IBM certified professionals who specialize in all elements of successful endpoint solutions and deployments. Our team has over 15 years of experience and has successfully deployed over 1M endpoints. The technical experts at TEKPROS help with everything from specifying, installing and configuring the infrastructure, to helping the client choose and deploy the modules that will make their environment secure, flexible and scalable. TEKPROS can work with IBM and the client every step of the way to ensure that customers can take full advantage of all the potential that Endpoint Manager delivers.

TEKPROS Services for Endpoint Manager Include:

- > Endpoint Manager POC/Test/ Development Lab.
- > Client/Prospect briefings and Sales Support
- > Tenured and certified experts in IBM Endpoint Manager.
- > A full spectrum of low cost and enterprise class architecture options.
- > Proven tools and methodologies for deployment automation and risk mitigation.
- > Audit confirmation to be sure all endpoints are managed.
