IBM SmartCloud Solutions: Software as a Service *Reinvent business with speed and innovation*

What is IBM Smart Cloud?

IBM SmartCloud Solutions enables organizations to execute business processes, analytics and applications as a service, and then realize cloud benefits by accelerating the time to market of these solutions and the transformation they bring. These solutions enable clients to reduce risk and capital investment, as well as the burden on IT resources, with instant and ongoing scalability to help them stay one step ahead of the market.

IBM SmartCloud Capabilities and Solutions:

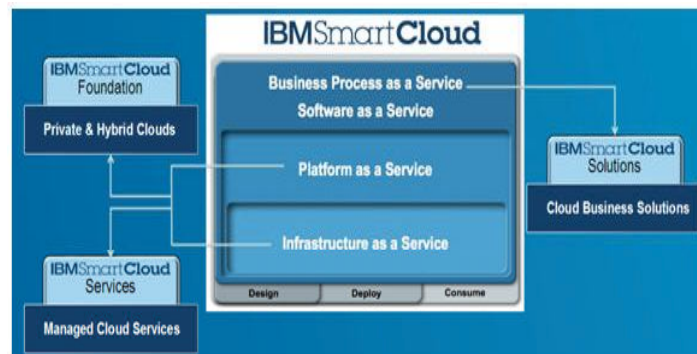

- > Increase agility
- > Turn information into insight
- > Protect data, applications and systems
- > Connect and empower people
- > Drive effectiveness and efficiency
- > Enable your internal resources to focus on providing higher value IT services to your business

IBM SmartCloud Offerings:

- > Single virtual appliance workloads
- > IT development and test environments
- > Mature packaged offerings, such as email, collaboration, sales force automation
- > Web application assessments for security and compliance
- > Isolated workloads where latency between components is not an issue
- > Desktop, storage, backup and restore solutions and services

IBM SmartCloud Highlights:

- > Accelerate business impact and grow revenue by leveraging cloud business applications
- > Leverage the cloud to engage better with employees, citizens, customers and extended communities
- > Deliver immediate access to business solutions across key needs
- > Reduce risk and capital investment with instant and ongoing scalability

TEKPROS IBM SmartCloud SaaS Model:

TEKPROS offer IBM Smart Cloud to all our customers as a Software as a Service (SaaS) model, with a single point of accountability. We deliver IT Cloud Services through remote service delivery and automation.

- > Leading IBM SmartCloud Service management capabilities
- > Flexible delivery options, including public clouds, private clouds, hybrid and purpose built infrastructure
- > A full spectrum of technology and capabilities for building both public and private clouds
- > Consolidate your Cloud computing environment as a single entity with us and have all with a single point of accountability.
- > Expertise and proven ability in infrastructure, applications, processes and information for all technology platforms to build on what you have and to integrate existing and new capabilities into cloud based solutions
- > Depth of knowledge and experience in industry specific business processes
- > Reduce capital expenditures and operational expenses
- > Ensure the right levels of security and resiliency for all business data and processes
- > Improve quality of services and deliver new services that help your business grow and reduce costs
- > Increase ability to quickly deliver new services to capitalize on opportunities for you while containing costs and managing risk

IBM SmartCloud delivered by public, private or hybrid models
